

CINETICA BASE 2.0

BASE 2.0 - Heavy Duty Floor Stand

The BASE is a very rigid and stable floor stand for special demands. If you are looking for a floor stand for greater freedom of movement or if you want to enhance your current equipment, the Cinetica BASE is the right choice. Heavy duty - this tripod offers a rock solid base with a load capacity of up to 350 kg for a wide variety of rigs, whether jib, slider or others.

In combination with our RISER it assembles a tripod that offers a perfect low-vibration substructure for almost every challenge.

Its folding mechanism, wheels and drawbar provide easy transport and quick positioning on the set.

Technical Specifications
