

CINETICA RISER

RISER - Flat Base column extension

The RISER is a heavy duty column extension. Our RISERS feature particular rigidity and maximum mechanical resilience. If you need a low-vibration extension for jibs, cranes, sliders, side loaders, etc. the Cinetica RISER is the right choice.

They are available in different lengths of 150, 200, 300, 400, 500, 700 and 1000mm. Together with the flat base mount (Mitchell) or with the additionally available Euro-Mount adapter, it offers a wide range of possible combinations for the desired application and height.

The combination of the RISER with the Cinetica BASE makes it the best possible substructure for the Cinetica NU.TRON. Nevertheless it can also be used for any application that requires a solid column.

Specific Functions

- maximum mechanical resilience
- Payload up to 500 kg / 110 lbs
- particularly stiff / low vibration
- Flat Base (Mitchell) -Mount

Technical Specifications

- Maximum payload: 500 kg / 1100 lbs
- Column heights: 150, 200, 300, 400, 500, 700, 1000mm
- Column heights: 5.9, 7.9, 11.8, 15.7, 19.7, 27.5, 39.0 lbs
- Adapter / mount: Flat Base (Mitchell) or Euro-Mount
- Overall diameter: 190mm
